### ***Drawings***

The drawings were received on August 15, 2007. These drawings are acceptable.

### ***REASONS FOR ALLOWANCE***

The following is an examiner's statement of reasons for allowance:

Claims 1-11 are allowable over the prior art of record because the prior art does not teach or suggest a method for separating an isotope of thallium in an atomic vapor containing a plurality of isotopes of thallium, said method comprising the steps of: (a) producing, (b) producing, (c) producing, (d) applying and (e) collecting as presently claimed, esp., the step of (d) applying said photons of said first, second and third frequencies to said vapor, wherein said photons of said first frequency pump isotope-selectively a plurality of ground state thallium atoms through an excited state into a metastable state, and wherein said photons of said second frequency excite a plurality of metastable state thallium atoms to an intermediate, resonant state, and wherein said photons of said third frequency ionize a plurality of atoms in said intermediate, resonant state through continuum states.

The prior art does not contain any language that teaches or suggests the above. *FR 2,790,974* does not teach wherein said photons of said third frequency ionize a plurality of atoms in said intermediate, resonant state through continuum states. *FR 2,790,974* applies an electric field to ionize thallium atoms

of the Rydberg state. Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
